

IN THE SPECIFICATION

Please replace the paragraph on page 7, lines 9-12, with the following amended paragraph:

The medium density polyethylene includes polyethylene having a density of about 0.92 - 0.956 g/cc. The medium density polyethylene can be composed of a single medium density polyethylene or a medium density polyethylene containing a minor percentage of hexene ~~hexane~~ or octene ~~octane~~ component.

Please remove the following paragraph after the paragraph on page 10, lines 1-6:

~~In a typical embodiment, the metal layer is about 100 - 400 angstroms, although other thicknesses are contemplated.~~
